# DESKTOP ALERT

INSTRUCTIONS FOR INSTALLING DESKTOP ALERT ON APPLE MAC OSX

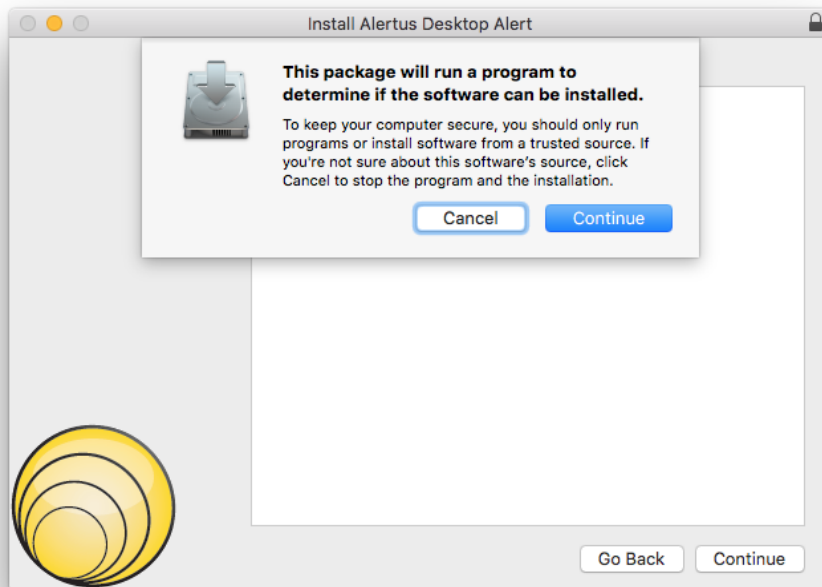

1. Download the msualertmac.dmg file from <http://alert.msu.edu> website

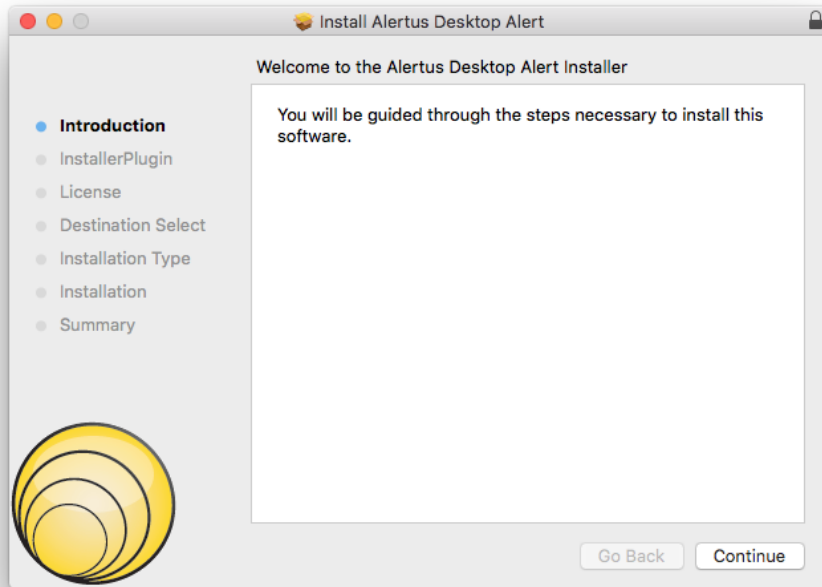

2. Open the DMG file to find the PKG install file

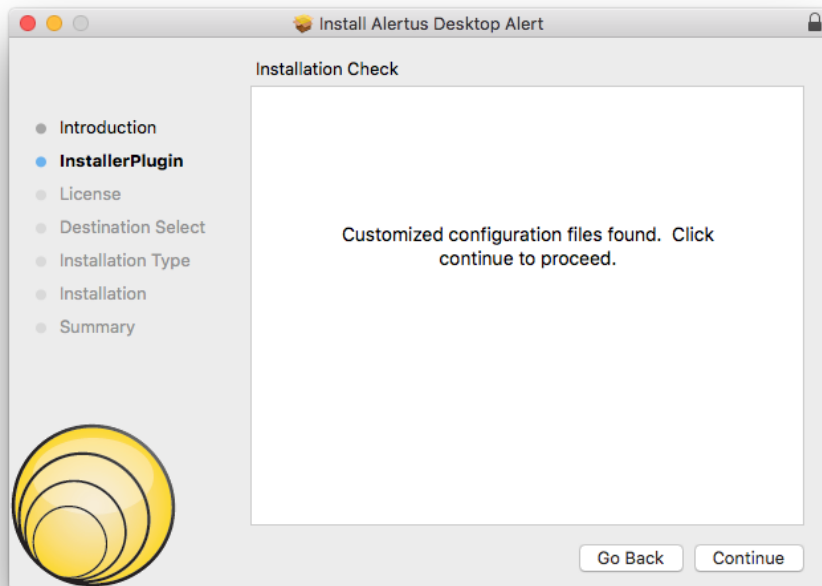

3. Run the PKG file to start the application installation; press continue when prompted

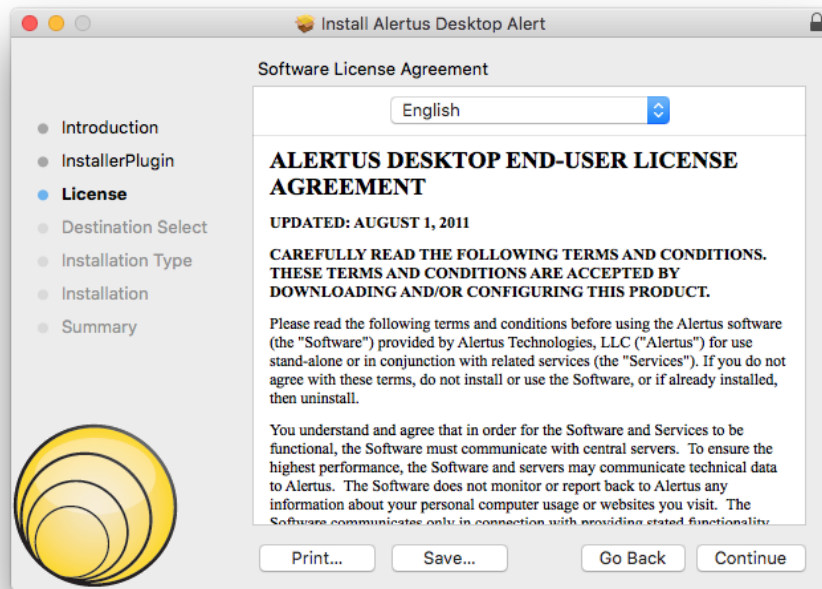

4. Press the continue button on the installation Introduction screen

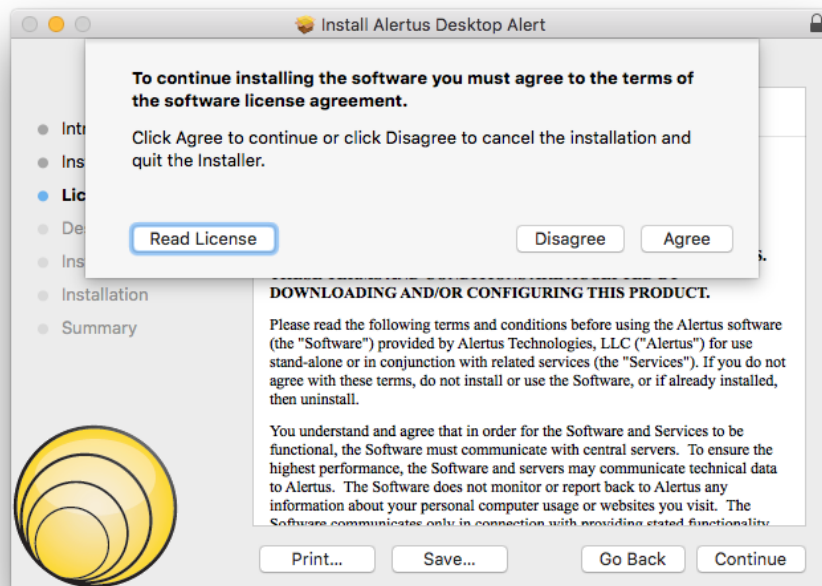

5. Press the continue button on the InstallerPlugin screen

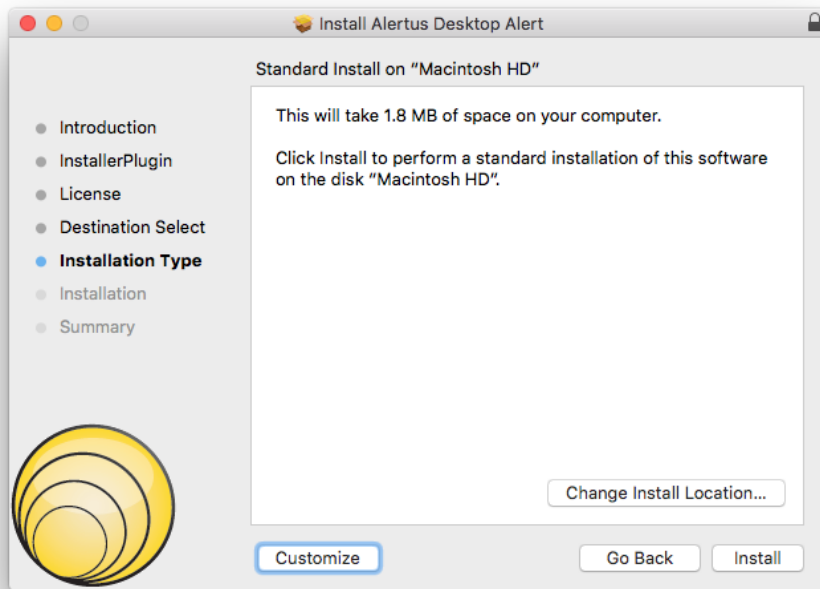

6. Press the continue button on the License screen

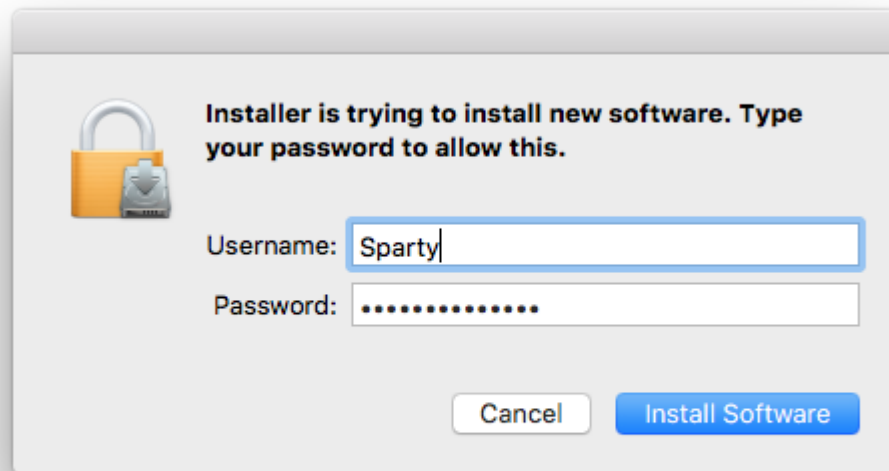

7. If you agree to the software license agreement, press the agree button

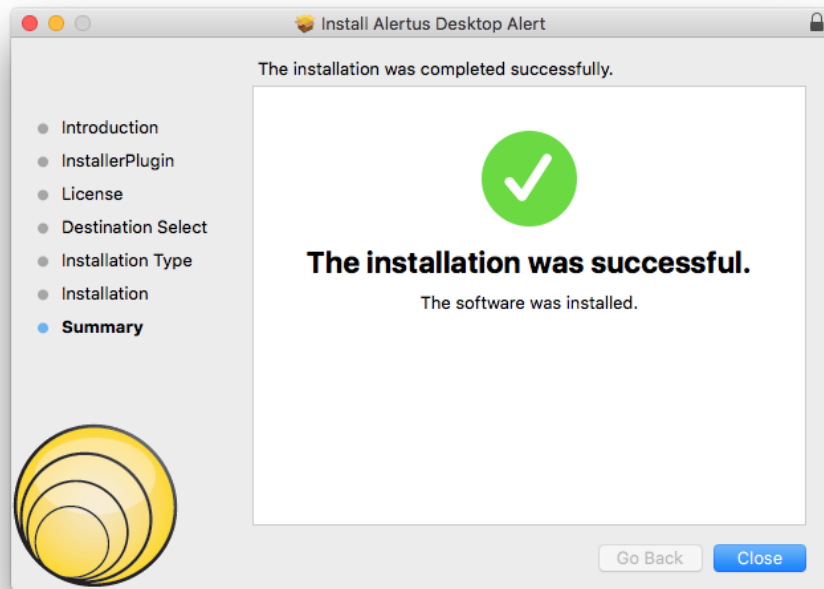

8. Press the install button to accept the default installation disk location

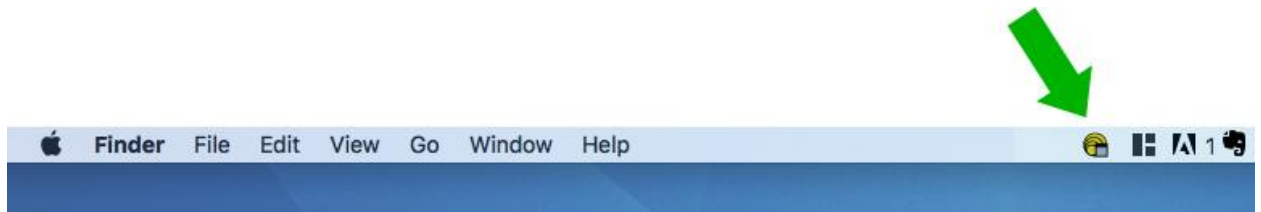

9. Provide your operating system credentials to permit the application to install on your computer

10. When the installation is complete, press the close button on the summary screen

11. When the application is running, an icon will appear in the right-hand side of the OS X menu bar as a menu extra

12. Clicking on the icon will display a menu; the status should indicate "operational"
